ServiceNow Developer | ServiceNow Certified System Administrator (CSA)

PROFESSIONAL SUMMARY

ServiceNow Developer and Certified System Administrator with 2+ years of experience in ITSM platform administration and development: Incident Management, Service Catalog, Flow Designer, REST integrations, and role-based access control. Built and evaluated an AI incident triage agent integrated with ServiceNow, including a blind two-rater audit of its accuracy.

PROFESSIONAL EXPERIENCE

ServiceNow Developer – Hydrozn | Remote **May 2026 – Present**

- Build and maintain ITSM functionality across Incident Management, Service Catalog items, and workflows
- Automate approvals, notifications, and task routing with Flow Designer and IntegrationHub
- Develop REST API integrations to connect ServiceNow with external systems
- Support CMDB data quality, configuration, and CI accuracy

ServiceNow Administrator – Starlite Infotech Limited | Bengaluru, India **Dec 2021 – Aug 2023**

- Managed 100+ Incident tickets per month maintaining 95%+ SLA compliance through optimized assignment group routing and escalation workflows
- Reduced average Incident resolution time by ~20% by configuring the impact/urgency priority matrix for faster triage and dispatcher routing
- Built and maintained 15+ Service Catalog items and Record Producers for software access and hardware provisioning, reducing email-based requests by 40%
- Administered user accounts, roles, and group memberships for 200+ platform users, enforcing role-based access controls
- Developed 10+ Business Rules and Client Scripts to automate form behavior, enforce data validation, and trigger field-level automation
- Migrated 3,000+ records using Import Sets and Transform Maps with 98%+ data accuracy; supported 4 upgrade cycles with zero production disruption

Software Engineer Intern – Starlite Infotech Limited | Bengaluru, India **Aug 2021 – Nov 2021**

- Developed 5+ responsive web pages (HTML, CSS, JavaScript), reducing load time by 15%, and integrated them with Python (Flask) REST services across 3 modules

VOLUNTEER EXPERIENCE

AWS DevOps Engineer (Volunteer) – Community Dreams Foundation (Nonprofit) | Remote **Sep 2025 – Present**

- Support AWS cloud infrastructure and CI/CD pipeline automation for the foundation's applications
- Monitor resources, troubleshoot infrastructure and deployment issues, and document cloud architecture and procedures

PROJECTS

AI-Powered ITSM Incident Triage Agent – Personal Project

- Built a Python agent that detects system issues and creates ServiceNow incidents via the Table API as a least-privilege integration user (itil role), using the instance's own categories and groups, with AI reasoning logged in work notes
- Evaluated LLM triage on 300 IT tickets; a blind two-rater audit (kappa 0.73–0.92) showed the benchmark labels were near-random, while the model matched human raters 80–95% on type and priority
- Identified missing caller/CI context as the main cause of assignment-group errors; adding team definitions improved group agreement from ~54% to 67–75%

Tech: Python, OpenAI API, ServiceNow REST API, psutil, GitHub • github.com/Akhil8176/itsm-triage-agent

Freelance Marketplace Platform – Capstone Project, Pace University

- Built a full-stack marketplace with 3 user roles, JWT authentication, role-based access control, 20+ RESTful APIs, and Stripe payments

Tech: React.js, Node.js, Express.js, MongoDB, Stripe API
